

Econo-Power International Corporation

The Clean Coal Gasification Company™

Distributed Gas Generation for Natural Gas Replacement

EPIC Business Strategy:

- ◆ Supply fuel gas as a substitute for Natural Gas
- ◆ Build, own and operate fuel gas production facilities on customer site
- ◆ Market to mid-sized natural gas users who do not have access to alternate fuel supplies as a way to stabilize price and guarantee supply
- ◆ Guarantee to deliver fuel gas at predictable contract rates over the long term - up to 15 years

Air-blown Coal Gasification Systems:

- Technically proven
- Environmentally superior
- Economically viable
- Fuel quality acceptable for GTG, boilers, process furnaces
- Availability >98%
- Used for refueling existing boilers, heaters, dryers and gas turbines to lower gas costs or eliminate need for pollution control on older coal boilers

Gasifier Systems:

- Nominal 100 MMBTU per hour per gasifier
- Multiple gasifier modules for higher demand
- Sulfur removal system to levels well-below PSD limits
- No particulate emissions
- NOx emissions significantly below natural gas

Basic information to pre-qualify a project:

- ◆ Current fuel and energy usage (MMBTU/hour)
- ◆ Load variability
- ◆ Application (boiler, gas turbine, etc.)
- ◆ Hours per year
- ◆ Type of coal available
- ◆ Area for gasification, coal storage and ash disposal
- ◆ Site details (elevation, temperatures, etc.)
- ◆ If gas turbine, model number, normal power output, combined cycle or simple cycle
- ◆ Credit standing
- ◆ Other pertinent information
